PALINDROME STRING

AIM:

Write a program to check whether a string is palindrome or not.

PROGRAM:

```
#include <stdio.h>
#include <string.h>

void main() {
   char str[100];
   int i, j, flag = 1;
   printf("Enter a string: ");
   gets(str);
   i = 0;
   j = strlen(str) - 1;
   while (i < j) {
      if (str[i] != str[j]) {
         flag = 0;
         break;
      }
      i++;
      j--;
   }
   if (flag==1)
      printf("The string is a Palindrome\n");
   else
      printf("The string is NOT a Palindrome\n");
}
```

COPY CONTENTS OF ONE FILE INTO ANOTHER FILE

AIM:

Write a program to copy the contents of one file into another file.

PROGRAM:

```
#include <stdio.h>
int main() {
   FILE *in, *out;
   int ch;
   in = fopen("input.txt", "r");
   if (in == NULL) {
      printf("Error: Cannot open source file!\n");
      return 1;
   }
   out = fopen("output.txt", "w");
   if (out == NULL) {
      printf("Error: Cannot open/create destination file!\n");
      fclose(in);
      return 1;
   }
   while ((ch = fgetc(in)) != EOF) {
      fputc(ch, out);
   }

   printf("File copied successfully!\n");

   fclose(in);
   fclose(out);

   return 0;
}
```
